Experience

Liquid – BU Manager, Cloud & AI Solutions | 2026–Present

Leading the Business Unit with responsibility for offering strategy, delivery governance, and team growth across cloud, data, and generative AI initiatives.

Business Unit Leadership

- Drive BU planning, pipeline support, staffing, and delivery oversight, aligning commercial priorities with execution capacity.
- Coordinate architects, engineers, and project teams across presales and delivery, ensuring quality, profitability, and customer outcomes.
- Own stakeholder relationships with executives and delivery leaders, translating business goals into practical technology roadmaps.

Cloud, Data & AI Strategy

- Shape cloud and GenAI solutions across AWS, Azure, and GCP, including landing zones, RAG architectures, AI gateways, and secure integration patterns.
- Define governance models for architecture, security, compliance, cost control, and operational readiness.

Presales & Delivery Governance

- Lead proposal shaping, estimation, technical storytelling, and solution review for strategic opportunities.
- Manage release/program governance for transformation initiatives, focusing on risks, dependencies, and measurable delivery progress.

Team Development

- Mentor architects and technical leads, strengthening consulting, delivery, and innovation capabilities within the unit.
- Promote reusable assets, accelerators, and delivery standards to improve consistency and speed.

Previous Roles (2016–2025):

Reply – Enterprise & Solution Architect / PMO / Technical Lead (2022–25): Cloud, GenAI, release governance, DIH, SAST CI/CD, BI dashboards, and application modernization.

Sky – Solution Architect (2022): Cloud-based digital projects (AWS, GCP, Azure).

Telepass – Cloud Architect (2021–22): GCP migration & optimization (Kubernetes, SQL DB).

Accenture – AWS Architect / Scrum Master / Solution Architect (2019–21): Mobility & IoT platforms, AWS/Azure integration, Agile leadership.

Harting – Product Specialist Integrated Industry (2018–19): Edge Computing & RFID solutions.

Capgemini – IoT Engineer & PMO (2016–18): IoT/M2M projects, 2nd-level support, stakeholder coordination.
