## PROFESSIONAL SUMMARY

Business Unit Manager and IT leader with a master's in Telecommunications Engineering and 10+ years driving cloud, data, and generative-AI transformation across AWS, Azure, and GCP. Progressed from hands-on solution architecture to owning offering strategy, delivery governance, and team growth in regulated banking and enterprise environments. Deep multi-cloud and GenAI expertise—landing zones, RAG, AI gateways—combined with presales leadership and P&L-aligned delivery.

## EXPERIENCE

### Liquid Reply — BU Manager, Cloud & AI Solutions

2026 – Present

Offering strategy, delivery governance, and team growth across cloud, data, and GenAI.

- Lead a Business Unit of **40** architects and engineers, owning offering strategy, staffing, delivery oversight, and alignment of commercial priorities with execution capacity.
- Drive presales for strategic opportunities—shaping proposals worth **€5M** and contributing to a **50%** win rate through estimation, technical storytelling, and solution review.
- Define multi-cloud and GenAI solutions (AWS, Azure, GCP)—landing zones, RAG architectures, AI gateways, secure integration—and establish governance for security, compliance, and cost control, reducing cloud spend by **45%**.
- Mentor architects and technical leads and introduce reusable accelerators, cutting solution-design time by **30%**.

### EFCWM Reply — Enterprise & Solution Architect / PMO / Technical Lead

2022 – 2025

Advanced through Solution Architect, Senior Architect, Release Manager, and Technical Lead on large-scale cloud and AI programs.

- Designed multi-cloud and GenAI blueprints (AWS, Azure, GCP) and a Digital Integration Hub on Azure, decoupling channels from core systems to improve resilience and scalability.
- Led rollout of an AI Gateway platform (RBAC, semantic caching, token/cost tracking, auditing) and built RAG pipelines (Azure Blob, AI Search, Azure OpenAI) for enterprise knowledge access.
- Directed release governance across multiple Reply entities—planning, risk mitigation, and dependencies for **50+** releases in complex banking environments.
- Embedded SAST into Terraform CI/CD pipelines, delivered AWS BI dashboards (QuickSight, Lambda, S3), and led .NET/Angular application modernization.

### Previous Roles

2016 – 2022

- Sky — Solution Architect (2022):** Cloud-based digital projects across AWS, GCP, and Azure.
- Telepass — Cloud Architect (2021–22):** GCP migration and optimization (Kubernetes, SQL DB).
- Accenture — AWS Architect / Scrum Master / Solution Architect (2019–21):** Mobility & IoT platforms, AWS/Azure integration, Agile leadership.
- Harting — Product Specialist Integrated Industry (2018–19):** Edge Computing & RFID solutions.
- Capgemini — IoT Engineer & PMO (2016–18):** IoT/M2M projects, 2nd-level support, stakeholder coordination.

## SKILLS

|                  |                                                                                         |
|------------------|-----------------------------------------------------------------------------------------|
| Cloud            | AWS, Azure, Google Cloud                                                                |
| Languages & Data | Python, Java, Oracle, MySQL, HTML5                                                      |
| Methodologies    | ITIL, Scrum, DevOps, Agile                                                              |
| Leadership       | BU management, delivery governance, presales shaping, stakeholder management, mentoring |

## CERTIFICATIONS

- Microsoft Azure Solution Architect Expert
- Microsoft Azure AI Fundamentals
- Microsoft Azure Administrator
- AWS Solution Architect Associate
- Scrum Master

## EDUCATION

Master's Degree in Telecommunications Engineering · University of Trento

2014 – 2016
